

SECUBOARD®

Bullet Resistant Clipboard

Ballistic Shield for the Police

The bullet resistant clipboard SECUBOARD® of SÄLZER offers additional and quick protection for the police officer against handguns.

The material was tested and certified in accordance with the European Standard EN 1522 + 1523 (bullet resistance) in the class FB4 NS up to .44 magnum.

SECUBOARD® offers protection in many dangerous situation, e.g. at the vehicle control, in settling a dispute ..

At a vehicle control the clipboard can be used quickly as a shield against if a weapon is suddenly drawn. Every police officer service knows this danger.

By the diagonal direction of fire and the short distance **the clipboard safeguards the complete upper part of the body as well as the neck and head which are not protected by a safety vest.** SECUBOARD® does not only protect against firearms but **offers also protection against attacks with a pick hammer, wrench or flying bottles.**

Brief description

Material: High-alloyed bullet resistant security steel.

Size: 27 x 34 cm / 10.63 x 13.4 “.

Weight: approx. 2.3 kg / 5.1 lb.

Equipment:

- Comfortable broad carrying strap, individually adjustable.
- Fixed handles at the sides. For each hand size suitable (incl. safety gloves).
- Pen holder and edge protection.

Color: Black RAL 9017.

Blue RAL 5005 or other colors available.

Handle: Stainless steel, brushed.

Optional: Rain protection foil fastened to the terminal strip.

Advantages

- 2 functions in one: writing and protecting.
- Can be quickly used as a shield, clipboard do not have to be turned.
- Easy transportation due to the broad carrying strap.
- Robust and long-lasting.
- Optimal addition to the protection vest (usable as a trauma plate).

Protecting Lives and Property. Worldwide.

Immediate protection in dangerous situations.

SECUBOARD® is sloped on the sides, due to that splinters are rejected at the bullet impact. Through this the injury risk for the hands is extremely reduced.

Use as a customary clipboard.

Additional Ballistic Protection: Retractable into the Security Vest

The clipboard can also be easily inserted sideways into the security vest for transportation (trauma plate). This makes an easy transport possible and guarantees an additional protection due to the "armor" in the jacket.

Insertable into the security vest or comfortable transport with carrying straps.

Furthermore the clipboard can be completely inserted for strengthening of the front part of the safety vest.
